SUBJECT INDEX, VOLUME XXIX

Acrylonitrile, ultrasonic polymerization, 531
Albumin, of human serum, light scattering, 53
Aluminum alkoxy chelate, hydrolysis, 637
Birefringence, streaming, of deoxyribonucleic acid, 77
Cationic polymerization, donor-acceptor interactions, 595
Cellulose derivatives, thermodynamics, 37
Cellulose nitrate, molecular weight, 399
Chain transfer, in radical polymerization, 579
Copolyamides, containing bisamidemethylene, 621
Cryoglobulins, 497
Deoxyribonucleic acid, streaming birefringence, 77
Dielectric properties, polyvinyl bromide, 103
Distribution function, polymers in solution, 161
Ebulliometer, for high molecular weight measurement, 219
Electron microscopy, for rate of emulsion polymerization, 417
Emulsion polymerization, rate related to particle size, 417
  theory, 557
Fractionation, analysis of data, 171
  into summative fractions, 183
Free radicals, in solids, 565
Gelation, theory of, 281
Graft copolymers, synthesis by radiation, 321, 367
Hydrogen bonding, in styrene–methacrylic acid copolymers, 307
Initiation mechanism, vinyl polymerization, 245
Initiators, labeled, 235
Intrinsic viscosity, short chain solutions, 127
Irradiation, of polymers in the solid state, 425
Isoelastic curing rates, 9
Kinetics, effects of salts on vinyl polymerization, 355
  vinylene carbonate polymerization, 257
Light scattering, human serum albumin, 53
  for rate of emulsion polymerization, 417
Lignin, polycondensations in formation of, 433
Macromolecules in solution, 141
Methacrylic acid, copolymers with styrene, 307
Molecular weight, cellulose nitrate, 399
Particle size, and rate of emulsion polymerization, 417
Polarography, influence of monomer on iron(III), 541
Polyacrylamides, from cyclic amides, 411
Polyanhydrides, aromatic, 343
Poly-6-caproamide, viscometry, 519
Polycondensations, in formation of catechin tannins and lignin, 433
  molecular distributions in, 455
Polyethylene, grafting by radiation, 321
  high-pressure, branching in, 191
Polyethylene-imine, polarization of fluorescent light, 375
Polyisobutene, molecular weight, 595
Polyisobutylene, grafting by radiation, 367
Polymer association, 307
Polymethyl methacrylate, second virial coefficients, 117
Polysulfone formation, 549
Polyvinylamine, synthesis, 629
Polyvinyl bromide, dielectric properties, 103
Polyvinyl chloride, crosslinking by radiation, 585
Proteins, charge and deformation, 61
Radiation, and crosslinking of polyvinyl chloride, 585
  for graft copolymers, 321, 367
Radical polymerization, chain transfer in, 579
Rubbers, synthetic, branching in, 605
Second virial coefficients, polymethyl methacrylate, 117
Spectra, rebound relaxation, 9
Starch, potato, depolymerization by vibration, 647
Statistics, configurational, of polymeric chains, 441
  of flexible macromolecules at interfaces, 3
Styrene, copolymers with methacrylic acid, 307

Sulfur dioxide, copolymerization, 275
Tannins, polycondensations in formation of, 433
Thermal diffusion, 69
macromolecules in solution, 505
Thermodynamics, cellulose derivatives, 37
Trifluorochloroethylene, influence of solvent on polymerization velocity, 573
Ultrasonic polymerization, acrylonitrile, 531
Vinyl-divinyl copolymerization, and the theory of gelation, 281
Vinylene carbonate, kinetics of polymerization, 257
Vinyl polymerization, effects of salts, 355
initiation mechanism, 245
Viscometry, analysis of data, 171
poly-6-caproamide, 519
Viscosity, monomolecular films, 381
melt, in styrene–methacrylic acid copolymers, 307
